

Builder Presentation

What is Outdeco?

- Made in Australia and new to North America.
- Modular pre-cut and ready-to-use decorative panels.
- Size 4' x 2' x 5/16", weighing 10-12 lbs depending upon design.
- Made of a weather resistant sustainable material called Weathertex.
- Weathertex is a leading product used in building siding and features a proprietary manufacturing process of combining hardwood and wax throughout the entire board.
- Weather resistant in all North American climates.
- Negative carbon footprint during manufacturing of the panels.
- Coated with a low VOC exterior primer - achieves a weathered look over 12-24 months.
- Refresh with decking or fence stain.
- Paint with a water based exterior paint – No sanding required.
- Covered by a 10 year warranty against cracking, rotting or splitting.
- Privacy 60-90%+ (screening compliance)
- Cooler and less expensive than metal.

Ready to install

- Easily mounts to a 2"x4" treated stud frame.
- Support struts not necessary.
- Easy to handle 4'x2' panels.
- Easy to cut , miter and sand.
- Suitable for PRO builders.
- Recommended install: Exterior decking screw, finishing nail gun and/or exterior grade construction adhesive.
- Outdeco panels can experience slight expansion/contraction in extreme temperature rages therefore spacing for exterior installations is recommended at 1/32".
- Symmetrical panels form a continuous theme.
- Typical project size: 12-24 panels
